MATERIALS CHECKLIST & DIY GUIDE

OXWORKS®

A — Glass Panel

B — Glass Hinge Panel

C — Glass Gate

D — Hinges & Latches

E — Spigot Posts

illustration only
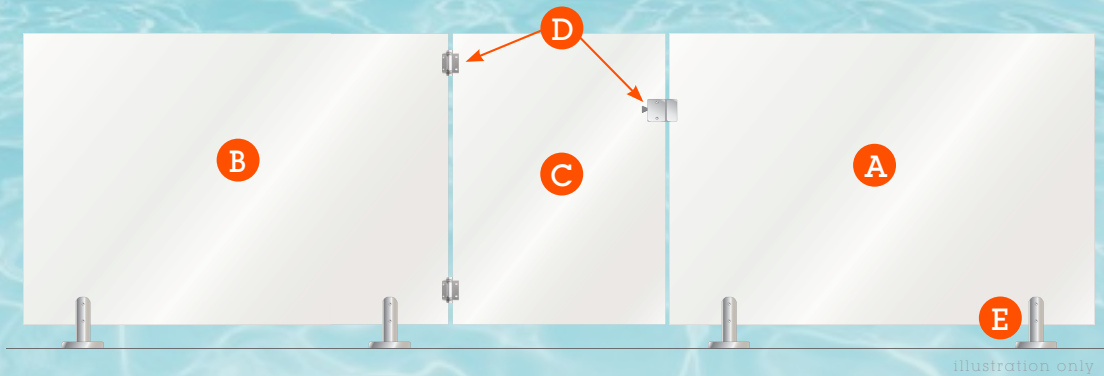

1 — Site Plan & Ordering

- Decide on fence position and panel sizes by creating a mud map of your site.
- Following the above Materials Checklist, calculate how many of each component you require
- Contact any one of our stores to complete your order. Most products are available in stock

2 — Stringline & Spigot Marking

- Using a stringline, mark out the desired line of the fence
- Mark out all spigot positions and panel placements according to the panel & gate sizes, starting with the gate
- Gaps between & below the panels should not exceed 100mm to comply with Aust. Stds AS1926.1

3 — Install Spigots & Panels

- Attach Spigots to Glass Panels using supplied pressure plate & rubber, ensuring not to tighten too firmly
- Place the panel with the spigots attached into position & bolt down or place into cored holes & grout
- Tighten the spigots & adjust panel position to ensure they are level and plumb

4 — Install Gate

- Attach the hinge & latch components of the Gate Kit to the 8 or 12mm Glass Gate as per instructions
- While chocking up the gate, attach hinge & latch components of the Gate Kit to the Hinge Panel & Gate as per instructions
- Ensure the gate self closes automatically and latches correctly. Adjust if required.

Care Instructions & Warranty:

Exposure to UV Light, pollution, salt deposits and chemicals can affect the long term performance of the fencing coating if not removed with regular washing.

A gentle monthly clean with a soft brush, warm water and mild detergent followed by a rinse of fresh water will maintain the finish of both powdercoated, Colorbond and stainless steel fencing components and fulfill warranty conditions.

10 Year Warranty Conditions Apply

HIGHEST QUALITY TOUGHENED SAFETY GLASS
